enterprise management theories about the so called bionic organization currently face a significant funding gap bionic theories have been mainly applied to enterprise lifecycle because of the presence of similarities between economic organizations and organisms the digital transformation has offered advancements in the bionics research field which enable us to discuss bionic organizations for the first time as business realities in which humans and machines especially robotic process automation systems and artificial intelligence tools cooperate in executing operations this book determines how a bionic organization can be defined and what are its fundamental elements in the case of banking specifically it investigates the two pillars of bionic enterprise which are technology and humans as well as the core

objectives and outcomes in order to provide an exhaustive overview the book proposes a new conceptualization of the business model of a bionic organization on the basis of the business model canvas framework ultimately the study of bionic organizations is aimed to discover also how they evolved in the post pandemic phase as a result of the disruptive events generated by the spread of the pandemic the research on the book has been conducted through a qualitative and descriptive methodology with the intent to build further knowledge about the topic starting from the information available in literature to provide actual evidence of the reality of bionic financial services the book includes case studies the organizations observed in the study have been selected since they present some of the key traits identified by the bionic enterprise theory the book demonstrates that bionic enterprise theory can be further enriched with the conceptualization of a bionic business model in which the paradigm of collaboration between humans and machines is a recurring element
