bracingly intelligent lucid balanced witty too a scrupulous and charming look at our modern understanding of genes and experience oliver sacks armed with extraordinary new discoveries about our genes acclaimed science writer matt ridley turns his attention to the nature versus nurture debate in a thoughtful book about the roots of human behavior ridley recounts the hundred years war between the partisans of nature and nurture to explain how this paradoxical creature the human being can be

simultaneously free willed and motivated by instinct and culture with the decoding of the human genome we now know that genes not only predetermine the broad structure of the brain they also absorb formative experiences react to social cues and even run memory they are consequences as well as causes of the will

researchers still haven't found the genes that underlie schizophrenia bipolar disorder adhd and autism perhaps they do not exist a genetic researcher in psychiatry and psychology urges we return our focus to family social and political environments as the sources of psychological distress

acclaimed author matt ridley's thrilling follow up to his bestseller genome armed with the extraordinary new discoveries about our genes ridley turns his attention to the nature versus nurture debate to bring the first popular account of the roots of human behaviour

should a species smart enough to foresee its own demise be able to consciously evolve in order to overcome threats to its existence evolve reveals the nexus of evolutionary biology sustainability and peace on the journey to pacem 2050 there is a burning platform threatening our species although our species is extremely good at cooperation social polarization is preventing our citizenry from being in adequate alignment to adopt the necessary public policy to mitigate future ecological disaster there are only three scenarios going forward extinction eusocial evolution or a long term cultural intervention to overcome our current lack of conceptual understanding lack of social empathy and lack of decision making to implement the solutions needed to mitigate catastrophe no single government action no corporate solutions or temporary changes in citizen behavior will resolve the challenges we face the problems are interconnected and the path to find solutions represents the solution itself a principle of evolution and of social change is that only the system can change the system pacem 2050 is the uncharacteristic social change strategy that changes the structure of how we share the realities of sustainability social polarization and approaching ecological tipping points

provides an overview chronology of events glossary and annotated bibliography on

biotechnology and genetic engineering

this book constitutes the refereed proceedings of the 8th joint international conference on serious games jscg 2022 held in weimar germany in september 2022 the 14 full papers presented together with 5 short papers were carefully reviewed and selected from 31 submissions jscg 2022 is dedicated to serious games and its interdisciplinary characteristics combining game concepts and technologies required in the different application domains this year s proceedings are categorized into the following topical sub headings learning psychology design aspects game design health games games application and mixed reality

have you ever met someone and felt an instant sense of attraction or repulsion even though you do not know the person in depth psychology this is an unconscious as well as alchemical reaction that is understood as part of psychic projective phenomena of affinity where a constellated chemistry between two individuals is ignited this phenomenon was understood by jung mythically as the unio mystica or the union of opposites this presentation will share how jung illustrated this psychological understanding of the transference phenomena in alchemical symbolism and illustrations taken from the 16th century alchemical text rosarium philosophorum he utilized these illustrations to show the connections that exist between the transformative process shared by alchemy and an analogous transformative process that he discovered in the psychic growth of an individual

evolutionary science is not only one of the greatest breakthroughs of modern science but also one of the most controversial perhaps more than any other scientific area evolutionary science has caused us all to question what we are where we came from and how we relate to the rest of the universe encyclopedia of evolution contains more than 200 entries that span modern evolutionary science and the history of its development this comprehensive volume clarifies many common misconceptions about evolution for example many people have grown up being told that the fossil record does not demonstrate an evolutionary pattern and that there are many missing links in fact most of these missing links have been found and their modern representatives are often still alive today the biographical entries represent

evolutionary scientists within the united states who have had and continue to have a major impact on the broad outline of evolutionary science the biographies chosen reflect the viewpoints of scientists working within the united states five essays that explore interesting questions resulting from studies in evolutionary science are included as well the appendix consists of a summary of charles darwin s origin of species which is widely considered to be the foundational work of evolutionary science and one of the most important books in human history the five essays include how much do genes control human behavior what are the ghosts of evolution can an evolutionary scientist be religious why do humans die are humans alone in the universe

in eden s garden rethinking sin and evil in an era of scientific promise richard coleman examines the notion of sin in a contemporary world that values scientific and nonreligious modes of thought regarding human behavior this work is not an anti science polemic but rather an argument to show how sin and evil can make sense to the nonreligious mind and how it is valuable to make sense of such phenomena examining themes in religion philosophy and theology it is ideal for use in the numerous courses which move across these disciplines

two theologians ted grimsrud and mark thiessen nation argue both sides of an issue that is vexing the postmodern church homosexuality this book develops the give and take over the differences between the two scholars but it also offers areas of agreement and consensus

we witness the full horror of the nuclear devastation wreaked upon hiroshima and nagasaki where he went as part of the first team to study the genetic effects of exposure to radiation and we journey with him as with wife priscilla by his side he travels deep into the amazon basin to conduct his classic population studies of the yanomama
