bodies and machines is a striking and persuasive examination of the body machine complex and its effects on the modern american cultural imagination bodies and machines first published in 1992 explores the links between techniques of representation and social and scientific technologies of power in a wide range of realist and naturalist discourses and practices seltzer draws on realist and naturalist writing such as the work of hawthorne and henry james and the discourses which inform it from scouting manuals and the programmes of systematic management to accounts of sexual biology and the rituals of consumer culture he explores other mass produced and mass consumed cultural forms including visual representations such as composite photographs scale models and the astonishing iconography of standardization

artificial life after frankenstein brings the insights born of mary shelley s legacy to bear upon the ethics and politics of making artificial life and intelligence in the twenty first century what are the obligations of humanity to the artificial creatures we make and what are the corresponding rights of those creatures whether they are learning machines or genetically

modified organisms in seeking ways to respond to these questions so vital for our age of genetic engineering and artificial intelligence we would do well to turn to the capacious mind and imaginative genius of mary wollstonecraft shelley 1797 1851 shelley s novels frankenstein or the modern prometheus 1818 and the last man 1826 precipitated a modern political strain of science fiction concerned with the ethical dilemmas that arise when we make artificial life and make life artificial through science technology and other forms of cultural change in artificial life after frankenstein eileen hunt botting puts shelley and several classics of modern political science fiction into dialogue with contemporary political science and philosophy in order to challenge some of the apocalyptic fears at the fore of twenty first century political thought on ai and genetic engineering focusing on the prevailing myths that artificial forms of life will end the world destroy nature and extinguish love botting shows how shelley modeled ways to break down and transform the meanings of apocalypse nature and love in the face of widespread and deep seated fear about the power of technology and artifice to undermine the possibility of humanity community and life itself through their explorations of these themes mary shelley and authors of modern political science fiction from h g wells to nnedi okorafor have paved the way for a techno political philosophy of living with the artifice of humanity in all of its complexity in artificial life after frankenstein botting brings the insights born of shelley s legacy to bear upon the ethics and politics of making artificial life and intelligence in the twenty first century

bridging modernist studies and science fiction scholarshipmodernism and time machines places the fascination with time in canonical works of twentieth century literature and art side by side with the rise of time travel narratives and alternate histories in popular culture both modernism and this cardinal trope of science fiction produce a range of effects and insights that go beyond the exhilarations of simply sliding back and forth in history together the modernist time obsession and the fantasy of moving in time help us to rethink the shapes of time the consistency of timespace and the nature of history key featuresdraws on insights from a range of sources including critical geography postcolonial theory science and technology studies and time studiesexamines different kinds of objects together sf impressionism and henri lefebvre s rhythmanalysis evolutionary biology eliot s the waste land and leinster s e sidewise in time e woolf philip k dick s alternate history and the film interstellar bullet time faulkner s racialized lag and jessica hagedorn s postcolonial anachronism e big history e olaf stapledon s two billion year novel of the human species and terrence malick s film tree of life

in this classic study of the relationship between technology and culture miles orvell demonstrates that the roots of contemporary popular culture reach back to the victorian era when mechanical replications of familiar objects reigned supreme and realism dominated artistic representation reacting against this genteel culture of imitation a number of artists and intellectuals at the turn of the century were inspired by the machine to create more authentic works of art that were themselves real things the resulting tension between a culture of imitation and a culture of authenticity argues orvell has become a defining category in our culture the twenty fifth anniversary edition includes a new preface by the author looking back on the late twentieth century and assessing tensions between imitation and authenticity in the context of our digital age considering material culture photography

and literature the book touches on influential figures such as writers walt whitman henry james john dos passos and james agee photographers alfred stieglitz walker evans and margaret bourke white and architect designers gustav stickley and frank lloyd wright

legibility in the age of signs and machines offers a compelling reflection on what the notion of legibility entails in a machinic world in which any form of cultural expression from literary texts films artworks and museum exhibits to archives laws computer programs and algorithms necessarily partakes in ever more complex processes of mass mediation divided over four clusters focusing on desire justice machine and heritage the chapters in the volume explore what makes something legible or illegible to whom or indeed what the kinds of reading processing or navigating such il legibility facilitates or forecloses and the role critical media theory literary studies and the humanities in general can play in tackling these and related issues contributors ernst van alphen anke bosma siebe bluijs sean cubitt colin davis katrine dirckinck holmfeld david gauthier giovanna fossati isabel capeloa gil pepita hesselberth yasco horsman janna houwen looi van kessel esther peeren seth rogoff roxana sarion frederik tygstrup inge van de ven ruby de vos peter verstraten tessa de zeeuw

the time traveller for so it will be convenient to speak of him was expounding a recondite matter to us his pale grey eyes shone and twinkled and his usually pale face was flushed and animated the fire burnt brightly and the soft radiance of the incandescent lights in the lilies of silver caught the bubbles that flashed and passed in our glasses our chairs being his patents embraced and caressed us rather than submitted to be sat upon and there was that luxurious after dinner atmosphere when thought runs gracefully free of the trammels of precision and he put it to us in this way marking the points with a lean forefinger as we sat and lazily admired his earnestness over this new paradox as we thought it and his fecundity

peter norton s introduction to computers 5th edition is a state of the art text that provides comprehensive coverage of computer concepts it is geared toward students learning about computer systems for the first time some of the topics covered are an overview of computers input methods and output devices processing data storage devices operating systems software networking internet resources and graphics

a revision of the first edition to include many new tips and techniques this guide provides additions of new chapters on active desktop webcasting outlook express frontpage express and special needs of users migrating from other windows operating systems and of laptop users new and enhanced features now available with the service pack 3 and the nt option pack are also highlighted with corresponding icons throughout the book
